Company Introduction

Company Introduction

Key Technology China Limited, established in 2006, is an ISO9001-2015 and GJB9001C-2017 registered enterprise and leading manufacturer engaged in research, development, sale and service of all kinds of rugged keyboards/input devices for challenging environments and jobs. With around two decades of professional technical expertise and a dedicated R&D team, we have expanded our capabilities by establishing **Key Technology Rugged System LTD** in 2020, a subsidiary focused on delivering high-performance rugged computing solutions for aerospace, industrial control, energy, transportation, construction, GCS, financial, automotive electronics, artificial intelligence, public security, and many other fields. Products include:

- ✓ Rugged Laptops & Servers
- ✓ Rugged Displays & Tablets
- ✓ Rugged KVMs
- ✓ Motherboards
- ✓ Rugged Joysticks

Tailed to your needs, our products stand for durability, reliability and cost efficiency, which are engineered to withstand extreme conditions and meet the increased demands of field use, regardless of industry. Committed to reliability under harsh environments, both companies synergize to provide end-to-end ruggedized HMI and delivery cutting-edge computing solutions for global industries. To ensure the quality and reliability of our products, Key Technology Rugged System Ltd manages the entire product development process in-house. From design and prototyping to manufacturing and testing, every step is carefully controlled and monitored to meet rigorous industry standards. "Survive by Quality, Develop by Innovation" is our corporate philosophy.
